What is claimed is:

- 1 1. A method for distributing video clips, comprising:
- 2 receiving a search request including at least one search
- 3 term;
- 4 identifying at least one video clip corresponding to the
- 5 search term;
- transmitting the video clip in a streaming-video format;
- 7 and
- 8 transmitting the video clip in a video-file format, wherein
- 9 the video clip is a portion of a longer video.
- 1 2. The method of claim 1, further comprising transmitting a
- license to display the video clip in a presentation.
- 1 3. The method of claim 1, further comprising transmitting a list
- of video clips corresponding to the search term.
- 1 4. The method of claim 1, further comprising receiving payment
- 2 information.
- 1 5. The method of claim 1, wherein the search term identifies the
- 2 subject-matter content of a video clip.
- 1 6. The method of claim 1, wherein the search term identifies a
- 2 concept illustrated by the video clip.
- 1 7. The method of claim 1, wherein the search term is a reference
- 2 to at least one Bible verse, and the video clip illustrates
- 3 the concept addressed by the Bible verse.

DOCKET NO. TERR01-00002

- 1 8. A computer program product tangibly embodied in a computer-
- 2 readable medium, comprising:
- instructions for receiving a search request including at
- 4 least one search term;
- 5 instructions for identifying at least one video clip
- 6 corresponding to the search term;
- 7 instructions for transmitting the video clip in a
- 8 streaming-video format; and
- 9 instructions for transmitting the video clip in a video-
- 10 file format, wherein the video clip is a portion of a
- longer video.
- 1 9. The computer program product of claim 8, further comprising
- 2 instructions for transmitting a license to display the
- 3 video clip in a presentation.
- 1 10. The computer program product of claim 8, further comprising
- 2 instructions for transmitting a list of video clips
- 3 corresponding to the search term.
- 1 11. The computer program product of claim 8, further comprising
- 2 instructions for receiving payment information.
- 1 12. The computer program product of claim 8, wherein the search
- 2 term identifies the subject-matter content of a video clip.
- 1 13. The computer program product of claim 8, wherein the search
- 2 term identifies a concept illustrated by the video clip.

1 14. The computer program product of claim 8, wherein the search
2 term is a reference to at least one Bible verse, and the
3 video clip illustrates the concept addressed by the Bible
4 verse.

PATENT APPLICATION

DOCKET NO. TERR01-00002

- 1 15. A data processing system having at least a processor and
- 2 accessible memory, comprising:
- means for receiving a search request including at least one
- 4 search term;
- 5 means for identifying at least one video clip corresponding
- 6 to the search term;
- 7 means for transmitting the video clip in a streaming-video
- 8 format; and
- 9 means for transmitting the video clip in a video-file
- 10 format, wherein the video clip is a portion of a
- longer video.
- 1 16. The data processing system of claim 15, further comprising
- 2 means for transmitting a license to display the video clip
- 3 in a presentation.
- 1 17. The data processing system of claim 15, further comprising
- means for transmitting a list of video clips corresponding
- 3 to the search term.
- 1 18. The data processing system of claim 15, further comprising
- means for receiving payment information.
- 1 19. The data processing system of claim 15, wherein the search
- term identifies the subject-matter content of a video clip.
- 1 20. The data processing system of claim 15, wherein the search
- 2 term identifies a concept illustrated by the video clip.

- 1 21. The data processing system of claim 15, wherein the search
- 2 term is a reference to at least one Bible verse, and the
- 3 video clip illustrates the concept addressed by the Bible
- 4 verse.

1	22.	A	data	processing	system	having	at	least	a	processor	and
2	accessible memory, comprising:										

- a data storage device storing a plurality of video files,

 each video file being stored in a format that can be

 transmitted over a data processing system network, and
 each video file being a digitally-encoded audio-video
 clip; and
 - a database storing keywordss associated with the video files, wherein at least one of the video files is associated with at least one keyword, and wherein at least one keyword identifies the subject-matter content of the audio-video clip.
